

Planestocks was the sole distributor contacted to acquire substantially all of the assets of a prominent military-focused **MRO** upon the retirement of its majority owner. Following a fair market value analysis of the inventory, Planestocks successfully facilitated delivery of the large inventory lot from New Zealand to South Florida.

Planestocks has since achieved over 1.8x return on the all-cash acquisition price, while selling less than 5% of the lot contents in the aftermarket.
