

A leading European **MRO** selected Planestocks to stock and manage its C&E inventory in our temperature-controlled facility South Florida. In doing so, the MRO achieves the dual benefit of consistent monthly income and cost savings associated with storing the parts at its facilities. Additionally, using our Vendor Platform, this MRO has digital trace documentation and next-day access to parts needed for scheduled maintenance work.

VENDOR
INSIGHTS

This MRO's inventory has a high turnover rate because parts are immediately available to end users and ship same-day from our South Florida facility.
